

Course Overview

Develop the skillsets needed to guide the delivery of value in a Lean enterprise—and learn about the activities, tools, and mechanics used to manage backlogs and programs—by becoming a SAFe® 5 Product Owner/Product Manager (POPM). During this two-day course, attendees will gain an in-depth understanding of the Agile Release Train (ART), how it delivers value, and what they can do to effectively perform their role.

They will also learn how to apply Lean thinking to write Epics, break them down into Features and Stories, plan and execute Iterations, and plan Program Increments. Finally, attendees learn about the Continuous Delivery Pipeline and DevSecOps culture, how to effectively integrate as Product Owners and Product Managers, and what it takes to relentlessly improve the ART.

Topics Covered

- Apply SAFe in the Lean enterprise
- Connect the SAFe Lean-Agile principles and values to the PO/PM roles
- Collaborate with Lean Portfolio Management
- Explore continuous value with Program Increment Planning and efficiently execute the Program Increment and deliver continuous value
- Comprehensively articulate the Product Owner and Product Manager roles
